THE INDIAN ASSOCIATION OF PHYSICS TEACHERS
A MONTHLY JOURNAL OF EDUCATION IN
PHYSICS & RELATED AREAS

VOLUME 14

NUMBER 05

MAY 2022

Borexino is a large-scale particle physics experiment that collected data until October 2021. Its key mission was to study low energy (sub-MeV) solar neutrinos using the Borexino detector, the world's most radio-pure liquid scintillator calorimeter, located at the Laboratori Nazionali del Gran Sasso near Aquila, in Italy. The Borexino Collaboration, the research team conducting the experiment, recently gathered the first experimental measurement of sub-MeV solar neutrinos using a scintillation detector. This measurement could open new possibilities for the hybrid reconstruction of particle physics events using Cherenkov and scintillation signatures simultaneously.

In the future, the measurement collected by the Borexino Collaboration could pave the way for new hybrid particle physics experiments that combine the strengths of scintillation and Cherenkov detectors. As their result is experimental and not based solely on simulations, it clearly demonstrates the feasibility these hybrid experiments.

ASTRONOMICAL TOOLS

ARMILLARY SPHERE

Armillary sphere or Spherical Astrolabe is an early astronomical device which model of celestial bodies in sky or celestial sphere. It consists of a spherical framework of rings, centered on the earth or the Sun, that represent lines of celestial longitude and latitude or ecliptic. With the earth as the centre, armillary sphere is known as Ptolemaic. with Sun as centre, it is known as Copernican. Armillary Spheres were developed by the Greeks in antiquity for use as teaching tools

Armillary sphere built by a German mathematician J Moeller (1687)

Copernican Armillary Sphere

A miniature sheet with serial number-consist of two stamps depicting Armillary Sphere and Theodolite

In European visual culture, the armillary Sphere was typically associated with human wisdom as it represents the intelligence of those who are capable of contemplating and questioning what has been deemed as universal truth

Tab attached with the stamps depict the armillary sphere designed by J Moeller

Armillary sphere used in Islamic Meragha by Ulugh Begh, in Samarkand observatory

Chief Coordinator (Examination)

Summer Internships – Need of the hour

Summer internships are targeted to the recent graduates offering opportunities to gain direct practical experience, mostly by the multinational companies. The assessment techniques for hiring the students vary according to contextual and business needs. Stipends are paid as per the Companies' policies. The students often face tough competition.

Lately, a very large number of school students have become interested in getting internships. Sadly, there are no opportunities for them, though internships have become an essential way to help them stand out as well as helping them financially. Our institutions need to introduce such opportunities. This will also engage and train the young minds, promoting their creative and innovative ideas. IAPT can consider promoting the idea.

Prof. Manjit Kaur

PHYSICS NEWS

Scientists turn a hydrogen molecule into a quantum sensor

Physicists have demonstrated the use of a hydrogen molecule as a quantum sensor in a terahertz laser-equipped Scanning Tunneling Microscope (STM), a technique that can measure the chemical properties of materials at unprecedented time and spatial resolutions. This new technique can also be applied to analysis of two-dimensional materials which have the potential to play a role in advanced energy systems, electronics and quantum computers.

The researchers describe how they positioned two bound atoms of hydrogen in between the silver tip of the STM and a sample composed of a flat copper surface arrayed with small islands of copper nitride. With pulses of the laser lasting trillionths of a second, the scientists were able to excite the hydrogen molecule and detect changes in its quantum states at cryogenic temperatures and in the ultrahigh vacuum environment of the instrument, rendering atomic-scale, time-lapsed images of the sample.

Read more at : <https://phys.org/news/2022-04-scientists-hydrogen-molecule-quantum-sensor.html>

Study improves the understanding of superconductivity in magic-angle twisted trilayer graphene

In recent years, physicists and material scientists have uncovered several new platforms for studying correlated phases of matter, such as superconductivity and the correlated insulator phase. Among them is magic-angle twisted trilayer graphene, a superconductor. This material consists of three sheets of graphene stacked together, with a rotational misalignment of approximately 1.5 degrees.

Past studies found that magic-angle twisted trilayer graphene exhibits superconductivity at remarkably high magnetic fields, far higher than those it would be able to endure if it were a conventional superconductor. While the superconductivity of this material is now widely documented, its underpinning physics is not yet fully understood. Researchers have recently carried out a study further investigating superconductivity in twisted trilayer graphene. Their research introduces important constraints that could shape existing theoretical models of superconductivity.

Read more at : <https://phys.org/news/2022-03-superconductivity-magic-angle-trilayer-graphene.html>

New hardware integrates mechanical devices into quantum tech

Researchers have developed a key experimental device for future quantum physics-based technologies that borrows a page from current, everyday mechanical devices. A prime example of such a device is the mechanical oscillator. When displaced by a force—like sound, for instance—components of the device begin moving back-and-forth about their original position. Creating this periodic motion is a handy way to keep time, filter signals, and sense motion in ubiquitous electronics, including phones, computers, and watches.

Researchers have sought to bring the benefits of mechanical systems down into the extremely small scales of the mysterious quantum realm, where atoms delicately interact and behave in counterintuitive ways. They have demonstrated new capabilities by coupling tiny nanomechanical oscillators with a type of circuit that can store and process energy in the form of a qubit, or quantum "bit" of information. Using the device's qubit, the researchers can manipulate the quantum state of mechanical oscillators, generating the kinds of quantum mechanical effects that could someday empower advanced computing and ultraprecise sensing systems.

Don't take me Lightly (Poem on Light)

Mr Light

I am Mr. Light
Listen to my plight

Physicists call me diplomatic
But still, for them, I am aristocratic.

Sometimes, I am a corpuscle
Casting Shadow for an obstacle.

I also behave like a wave.
For communication to be my naive.

At very high speeds, I travel
For atomic riddles to unravel.

New phenomena I detect
Invisible things are in my closet.

My energy lies in a photon
Believe me, I knock out an electron.

I do reflect, I scatter
but never loiter.

I diffract, I refract
But never retract.

When there is a path difference
I cannot stop interference.

In phase constructive, Out of phase destructive.
Nevertheless, I am a detective.

I get reflected, absorbed and transmitted
But still, I am located.

Old phenomena I signet.
Unknown Crystals I detect.

Ruby makes me doubly refracting
To leave me ordinarily and extraordinarily
illuminating.

My vibrations can be confined to a plane.
For polarization to find a lain

Without me exploring thing can remain at bay
Nature relies on me to make me a hopeful ray.

Report Ammani Anveshik

Activities -Feb 2022

1.Organized by: Acharya Initiative,Agastya International Foundation,

Anchor Ms Sushreeta Resource Person: Prof Sarmistha Sahu,

Date and time of the event: 7 Jan 2022, 6.30-8.00 pm

Participants: Teachers of Odisha

No. Of Participants: 30 Conducted at: Online (Zoom)

Topic: Constructivism-Self Learning by Doing;
Planar and Solid Angle with multiple reflection

[Study the reflection and construct the solid angle.](#)

Physics Teachers are aware of reflection, image, and object, but for the first time they related this to planar and solid angles, did activities, observed intently, realized the relation between the angles and number of images, predicted the connections, verified by very many applications, extended it to 3-dimensions and saw the differences and similarities of planar and solid angles. They explored further to draw conclusions precisely and committed to apply the techniques in their classrooms.

2. Organized by: Mr Joyce Sebastian

Resource Person: Prof K Subramanian

Date and time : 5 Feb 2022, 3.00-4.30 pm

Participants: Std XI

No of Participants: Of 25 Conducted at: Kendriya Vidyalaya Air Force School, Atal Tinkering Lab

Topic: On Line Lecture Cum Experimental Demonstration

I. Power point presentation:

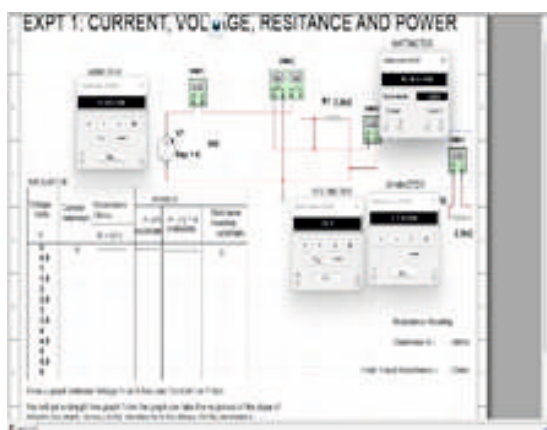

Power point Slides were presented covering the following topics:

- *Basic Components: Resistor, Capacitor, Inductor and Transformer Applications*
- *Basic Quantities: Voltage, Current, Power, Magnetic Field*

- *Basic Instruments: Voltmeter, Ohmmeter, Multimeter, Wattmeter, CRO*

In this experiment Professor Subramanian explained how to construct the above circuit with Multimeters using as Voltmeter, Ammeter and Ohmmeter. Wattmeter is also inserted to measure Power. Input DC Voltage is varied from 0 to 10 volts in steps of 0.5 volts and corresponding Ammeter Readings, Voltmeter Readings and Wattmeter Readings are entered in the Tabular Column. With Multimeter used as Ohmmeter the value of Resistor used in the circuit is measured. With readings taken, a Graph is drawn between Voltage on X Axis and Current on Y Axis is drawn. From Graph Professor explained Verification of Ohm's Law and how to find Resistor value from Graph. Its value is also checked using third column of tabulation using the formula $R = V/I$ and also Power P computed from formulae $P = V \cdot I$ and $P = I^2 R$ and verified with Wattmeter Readings.

Multisim Software

Professor Subramanian introduced three more experiments and concluded his lecture.

Number of students eagerly watched the presentation. Dr. Samantha, IAPT, Centre for Scientific Culture, Midnapore interacted with speaker, The meeting concluded with vote of thanks delivered by Mr. Joyce Sebastian, Teacher, Kendriya Vidyalaya Air Force School Yelahanka Bangalore.

3.Organized by: Acharya Initiative, Agastya International Foundation, Anchor Ms Mandakini

Resource Person: Prof Sarmistha Sahu,

Date and time : 22 Feb 2022, 6.00-7.30 pm
Participants: Teachers of Odisha

No. Of Participants: 25 Conducted at: Online (Zoom)

Topic Electromagnetic Induction – Demonstration from a distance; Activity Based Lecture

The introduction of the topic was done with a picture of mortar and pestle, but the question generated, and suggestions received was mind boggling. School science teachers participated whole heartedly and progressed step-by-step till they had come to the clear understanding of the concepts. Creating knowledge by self-questioning and peer collaborations emerged. The demonstration, related videos and elaboration was built in meticulously. The models devised from scrap was highly appreciated; demonstrated fundamental principles and clarified all that the teachers were teaching from the textbooks as definitions and laws.

4.Organized by: LEAF, Mrs Netra, Science Teacher.

Resource Person: Prof K M Raghavendran, MES

Degree College

Date and time : 28 Feb 2022 Participants: 8/9/10 class students

No. Of Participants: 60 Conducted at: Gowtham High School.

The rapport between the teacher and the taught!

5.Organized by: Dr Madhukar R

Resource Person: Dr. Jayanth Vyasankere, Azim Premji University

Date and time: 28 Feb 2022 No. Of Participants: 80

Conducted at: RTES Degree College, Ranabenur (Online)

(Khandelwal's IAPT Reaching the Unreached)

Topic: Chasing the Light....

It was an online discussion with around 80 UG students about different aspects of the speed of light, its meaning, measurement methods, its role in relativity and apparent paradoxes associated with superluminal motion. Jayanth Vyasankere led the discussion in an interacting mode and students enjoyed the train of thought.

6. Organized by: Dr Shivaram N

Resource Person: Dr. Shiva Hullavarad Date and time: 28 Feb 2022

Participants: I and II PU No. Of Participants: 100

Conducted at: K H Patil College, Vidyanagar, Hubballi

Topic: Nano Technology

There was a special talk on nano technology to PU Science Students on the occasion of Science Day (28th February 2022) at K H Patil College. Around 100 students participated. The chief guest for this program was Dr Shiva Hullavarad, who is compliance officer at Alaska University, Fairbanks, USA. The program started with invocation song by II PU student. Dr Shivaram Patil, welcoming the audience, spoke on importance of Science and also about brief history of few scientists. Prof Shankar Kumbar introduced the chief guest. Later Dr. Shiva Hullavarad gave a talk on nano technology. Students after the talk interacted with the speaker and clarified their doubts on the topic. Prof Sannagouder, Principal in his presidential speech, expressed his happiness and said if he had listened to such lectures in his student life he would have opted Science instead of Arts. Prof Roopa Bhavikatti, anchored the program and also gave vote of thanks at the end of the program.

Sarmistha Sahu

REPORT RC-07

State level competition CPEX-2022

Venue: Department of Physics, Gujarat University, Ahmedabad

Dated: 25th March, 2022 between 12.30 pm to 3.30 pm.

A Competition on Physics Experiments CPEX-2022

was organized in the months of February and March, 2022. This year we began by forming the CP Ex RC - committee; Dr. D. H. Gadani, Prof. V. H. Thakkar, and IAPT Bulletin, May 2022

Dr. Rucha Desai.

Competition for +2, UG, PG and Research students, and Teachers (*Khandelwal Centenary Celebrations*), CPEX-2022 (*cluster level*) was organized by Various Departments/ Colleges from different regions of Gujarat in Association with RC-07, Gujarat, in the months of February and March, as stated:

Sub- region	Cluster	Coordinators
S1	North & East Gujarat	<ol style="list-style-type: none"> 1. Prof. G. L. Vekaria (9428063766), Sir P. T. Science College Modasa, 2. Dr. Darshan Vyas, HNGU, Patan (North Guj), and 3. Dr. Kiranbhai K. Patel (987938060), Science College, Talod
S2	Ahmedabad area	<ol style="list-style-type: none"> 1. Dr. D. H. Gadani (9879005755) Department of Physics, Gujarat University, Ahmedabad, and 2. Dr. P. G. Acharya, (9879239403) KKSJ Maninagar Science College, Ahmedabad
S3	Gandhinagar area	<ol style="list-style-type: none"> 1. Dr. Chetan Chauhan, (9825765981), and 2. Dr. G.R Patel (9427838047) Govt. Science college, Gandhinagar, 3. Dr. Dipika Patel, (9974261285), IITE, Gandhinagar, 4. Dr. Manjul kumar, (9426381640) Head, Physics Department, KadiSarvaVishwavidyalaya, Gandhinagar
S4	Central Gujarat: (i) Vadodara- Bharuch	<ol style="list-style-type: none"> 1. Dr. Chetan G. Limbachiya (9824058280) Applied Physics Department, Faculty of Technology, MS University of Baroda, Vadodara
	(ii) Anand-Changa- Dakor	<ol style="list-style-type: none"> 1. Dr. Tarun Trivedi (9825025021) Physics Department, Bhavan's College, Dakor – Dist. Kheda 2. Dr. Rucha Desai (7575885505) Charusat University, Changa, Dist. Anand,
S5	South Gujarat	<ol style="list-style-type: none"> 1. Prof. V. H. Thakkar (9426120840) Sir P. T. Science College, Surat; and 2. Prof. Anil Bhatt (9879067415) Navyug Science College, Surat
S6	Saurashtra	<ol style="list-style-type: none"> 1. Dr. G. M. Sutaria (9727285615) Sir P. P. Institute of Science, Bhavnagar; and 2. Dr. Nimisha Vaidya (9427223276) Christ College, Rajkot
S7	Kutchh	<ol style="list-style-type: none"> 1. Dr. Anil Gor (9825084444) R. R. Lalan College, Bhuj; and 2. Dr. Niraj Pandya (9409014835) Tolani Arts & Science College, Adipur – Kutchh

In the first phase, the 7 Clusters organized the competitions for innovative experiments in Physics as well as computational Physics, during February/March, 2022 depending on their convenience avoiding exam timings of students. Each cluster selected first two entries from each category. Around 150 students/teachers participated in the competition at cluster levels, out of which 35 participants were selected for presentation at state level competition.

The problem was to organize state level contest..! Offline...online..following "Covid Guide lines".

Also, Where and When to organize.!?

Finally, Department of Physics, Electronics & Space Sciences, Gujarat University, Ahmedabad took the initiative in collaboration with RC-7 (Gujarat) to organize State level competition CPEX-2022, at Ahmedabad.

The State level competition CPEX-2022, was held at Department of Physics, Gujarat University, Ahmedabad on 25th March, 2022 between 12.30 pm to 3.30 pm. The High tea in the morning on arrival, Lunch in the noon and again Tea with breakfast after the valedictory function were provided to all participants and the attendees of the State Level Final at the department itself.

During the program, Students' parent institutions were kind enough to provide them the TA for reaching the venue.

Total number of participants was 34 out of which 28 in offline mode and 6 in online mode, which were selected at cluster level of different districts of Gujarat. We found that the participants were enthusiastic; also the students and some faculty members from the department of Physics and other colleges also visited the demonstrations of the experiments. Teachers and some parents from

different regions of Gujarat encouraged the student participants by joining and travelling with the students to Ahmedabad.

Prof. R. B. Jotania, Prof. Dipti Tripathi, Prof. Viresh Thakkar and Dr. Aditya Vora served as valuable judges in the state level competition.

Dr. Punit Suthar (from C. U. Shah Science College, Ahmedabad) was present whole day for any help required. The teachers accompanying students from different regions of Gujarat state were very much supportive and encouraged the students.

The list of participants who won prizes for their innovative experiments is attached here. Some of the photographs of the event are also attached. While giving prizes to the participants we tried innovative way that instead of cash prizes or memento, we gave experiment kits of Magnets as well as Kits of Optics experiments to the winners. At the end we collected feedback from the participants and the viewers and found that

We are thankful to Gujarat University for providing valuable infrastructure and support.

We are thankful to Prof. P. N. Gajjar, Head, Department of Physics, Electronics & Space Sciences, Gujarat University, Ahmedabad, as well as teaching and administrative staff, as well as research scholars of the department for their valuable support.

We thank all coordinators at cluster level for sending the participants timely and preparing them well for the presentations. they requested to continue such activity every year.

We also thank office bearers of IAPT RC-7, for the financial and administrative support.

D. H. Gadani, V. H. Thakkar, and Rucho Desai

Seminar on Importance of Industrial Training for UG Science Students

Resource Person: Mr JAI SINGH, Director of Edison Tech Centre, Dhuri

Schedule: 10:00AM-1:00PM on 13/04/2022

Sponsored by : DBT Star College Scheme and IAPT (RC-02)

Activity Incharge: Dr Kulwinder Singh Mann

Participating Departments: Physics, Chemistry and Mathematics

Beneficiaries: Students of B.Sc. I and II

Program Coordinator: Dr. Gurpreet Singh

Department of Physics, DAV College Bathinda, under the DBT STAR College scheme organized a Seminar on the topic "Importance of Industrial Training for UG Science Students". The resource person was Mr Jai Singh, Managing Director of the Edison Tech Centre situated at Dhuri, District Sangrur of Punjab. Recently on 29th October 2021, a group of our UG students visited the Tech Centre. But, due to some unavoidable circumstances, the director was unable to interact with our students. Then, he promised that in near future I will personally visit your college and interact with the students. Today, he fulfilled his promise by visiting our college at 9 AM.

Dr Gurpreet Singh, Head and Associate Professor of Physics introduced the resource person. Dr Kulwinder Singh Mann, Coordinator of DBT Star College Scheme welcomed the resource person. Mr Jai Singh interacted with students and shared his valuable experiences with them. He started his talk by giving importance to education by saying that it is the third eye for humans. He shared many examples for motivating students to set and achieve their goals. He told that there is no alternative to

self-study. He suggested that every student should have his/her own collection of good books. He suggested that Engineering Drawing must be the part of syllabi of UG-Science classes. Additionally, he suggested making a provision for Industrial-Training in the curriculum. He provided many tips to the students for Job Interviews and personality development. Mr Singh emphasised that there is a dire demand for Technical Experts in the Industrial Sector. He further suggested to the students to develop a passion for learning by doing with their hands. He said that girls should come forward to the technical field by giving the example of his own daughter Er. Khushpreet Kaur. She is in charge of the training wing of the Marhar Power Control Pvt. Ltd. Dhuri, Sangrur. The Mahar Power Control Pvt. Ltd. is a pioneer in devising controlled power units in different types of industrial electric power management related devices. He agreed to sign an MoU with our college for providing regular industrial training to some UG students. He had solved the physics department's problem by agreeing to repair some old equipment.

The attendees asked many questions during the seminar. Prof. Harpreet Kaur, Dr Vikas Duggal, and Lab. Staff: Mr Deepak Kumar, Mr Rakesh Kumar Mr Hans Raj (Electrician) were also present during the seminar. The feedback provided by the beneficiaries indicated that the seminar remained useful. The event concluded with a vote of thanks to the resource person.

K.S. Mann
Activity Incharge

JV-IAPT ANVESHIKA ACTIVITIES Academic Session 2020-21

In the Academic Session 2020-21, the JV-IAPT ANVESHIKA conducted most of its activities in online mode. The National Anveshika Experimental Skill Test (NAEST) 2020-21 was held in online mode. The details of enrolment and participation are as follows –

1. Total number of students enrolled (all over India) : 48000 approximately.
2. Total number of students appeared the screening round : 13000 approximately.
3. Total number of students appeared in Prelims : 12000 approximately.
4. Total number of students enrolled from Baraut region : 962
5. Total number of students in Semifinals and Final rounds : 36
(Held online under the direct supervision of NANI)

JV-IAPT Anveshika centre is happy to inform that **Mr. Harsh Pratap Singh**, the winner of NAEST 2020-21, is associated with the **JV-IAPT Anveshika** since his formative years, although he was a student of Delhi University then. He participated in the NAEST examinations in previous years too. In the academic year 2020-21, NAEST being conducted online not offline, was conducted in a centralized manner.

Mukul Rathi
Co-ordinator
JV-IAPT anveshika
Janta Vedic College, Baraut

Workshop at RKM Vidyamandira, Belur Math (Organised jointly by the RC 15 and Physics Dept of Vidyamandira)

It is a well known fact that due to the pandemic related situation prevailing all over the country our students who are now studying in the second or fourth semesters of UG physics courses have suffered a lot academically. They virtually did not get much opportunity to attend the regular classes assembling in their institution nor did they get any laboratory training worth mentioning in last two years. In the process these students could not have the experience of doing real experiments by hand during their different phases of plus two course and initial UG courses. Both the teachers and the students are feeling this inadequacy and the institutions are trying to take some remedial steps for these. The Ramakrishna Mission Vidyamandira, Belur Math, a NAAC accredited A+ Autonomous College under the University of Calcutta invited the RC 15 to conduct a Workshop on laboratory experiments for the 2nd and 4th semester students of the institution. Accordingly a two-day workshop was held in the department of physics of Vidyamandira on March 21 & 22, 2022.

The RC 15 members met online a couple of times beforehand to finalize the experiments that were to be performed by the students participating in the Workshop. Two basic ideas were kept in mind, viz. the experiments should be short and simple and could be done with the basic apparatus available in a UG lab. Selected experiments were to cover as many areas as possible which the students come across in their UG course. Accordingly a list of about 10 experiments was

prepared out of which four were from optics, one was from oscillation, two were from electricity, and one each was from sound and thermal physics. The diffraction experiment from the IPhO 2015 was also set up.

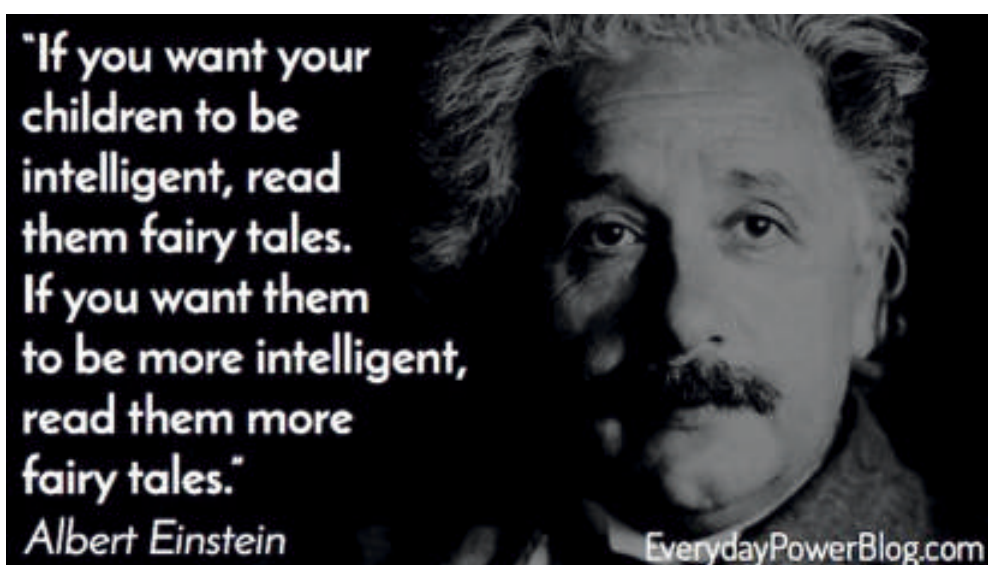

On Sunday, March 20 RC 15 life members assembled in the physics lab of the College and set up the experiments. The College being a residential one a good number of students who would actually participate in the workshop came to extend their support in this work and in the process could learn the basic principles of the experiments. On March 21, The Head of the Department of Physics, Dr. Bhabesh Roy

welcomed the members of RC 15 and introduced them to the Physics faculty and the students. Prof. Surajit Chakrabarti, a senior member of RC15 then elaborated on the purpose of the workshop. He then stressed on the use of smart phone as a new powerful tool in doing interesting experiments in Physics. He explained one optics experiment in which the students were to take a photograph of the college building by their smartphone. By analyzing the photograph by the Microsoft software 'Paint', students were to determine the height of the building and its distance from where the photograph was taken. Two of RC15 young dedicated members Shumen Starker and Sango Kumar Pal then explained how to use the 'Paint' software to get the measures of height and distance. For an experiment on sound, students were instructed to download for free the software Phyphox. With the sound generator of the software students performed an experiment to find the velocity of sound using a resonance column. For other experiments a manual was prepared for the benefit of the students. Another young RC15 member, Abir Samanta also chipped in trying to solve problems faced by the students in the whole day's programme. On March 22, students performed the experiments on their own. Most of the students could do 60-70% experiments during the stipulated period but the

exercise has motivated them to further explore these or similar experiments making use of the easily available materials and equipments. They were impressed by realizing the power of smart phone and other freely available software for performing various physics experiments.

The initiative of Dr Bhabesh Roy, HOD of the physics department of Vidyamandira is worth mentioning. Finally special thanks must go to the authorities of the Vidyamandira and particularly to the Vice Principal, Swami Mahapragyanandaji Maharaj for smooth conduct of the entire workshop.

National Competition For Innovative Experiments In Physics (NCIEP) – 2022

National competition for innovative experiments in Physics (NCIEP) is being held since 2003, to encourage Physics Teachers, students and Physics educators to conceive and set up original innovative experiments in Physics. The Competition is held every year at the venue of the Annual Convention of IAPT. Innovation rather than sophistication is the main theme and therefore the use of computers for data acquisition and display is not allowed.

Please read the following guidelines:

1. (A) The participant can be a teacher at any level or M. Phil. / Ph. D. awarded /Ph.D. pursuing student or a Scientist from national laboratories or a Science communicator working in science centres, etc. He/she need not be an IAPT member.
(B) The participant can be a student pursuing UG/PG course
2. The experiment should be an original one, designed by the participant himself/ herself. It can be even a demonstration type experiment.

Top 3 experiments from each category A and B are awarded cash prizes

1. The covering letter in the form of an email must contain: Title of the experiment, name of the participant (s) with age, category A / B, institutional affiliation of each participant, address for correspondence, email address and

mobile number along with the following declaration:

“The proposed experiment is original, designed and developed by the participant(s) and not published / submitted elsewhere”.

2. Please submit the write-up of experiment as an email attachment (word & PDF file) to the coordinator at the email id: **gitors61@gmail.com** in the following format: Times New Roman, font size 12, line spacing 1.5, justified, sufficient margins on all sides. It should contain title of the experiment, abstract of the experiment (not exceeding 300 words), detailed theory with necessary diagrams, procedure, observations, calculations, graphs, results and references. There is no limit for the number of pages. The participant should not write his / her name, name of college / school, etc. anywhere. This may reveal his/her identity.
1. Selected entries from each category will be invited for demonstration at the 36th IAPT convention. The dates and venue will be notified later. The invited participants will be paid railway fare from workplace to convention place as per IAPT rules. In case of joint authors only one of the participants is eligible to receive TA (as per IAPT rules). Top ten student participant entries (only category B) may be

Category	Participants	First Prize	Second	Third prize
A	Teachers/scientists/science communicators/ Students pursuing M.Phil/Ph.D	Rs 7000/-	Rs 5000/-	Rs 4000/-
B	Students pursuing UG/PG course	Rs 7000/-	Rs 5000/-	Rs 4000/-

given an amount of Rs 1000/- each towards expenditure incurred towards setting up the experiment. The selected participant has to come with his/her own setup for final demonstration.

competition. IAPT bulletin has ISSN number 2277-8950.

10. **Closing date to receive the entries is August 20, 2022.**

7. Please feel free for any query at Tele. No. 9449930024

8. **Decision of the judges will be final.**

9. The abstracts of all the selected experiments will be published in IAPT bulletin after the

MATLAB was invented by mathematician and computer programmer Cleve Moler. The idea for MATLAB was based on his 1960s PhD thesis. Moler became a math professor at the University of New Mexico and started developing MATLAB for his students as a hobby. He developed MATLAB's initial linear algebra programming in 1967 with his one-time thesis advisor, George Forsythe. This was followed by FORTRAN code for linear equations in 1971.

In the beginning (before version 1.0) MATLAB "was not a programming language; it was a simple interactive matrix calculator. There were no programs, no toolboxes, no graphics. And no ODEs or FFTs."

The first early version of MATLAB was completed in the late 1970s. The software was disclosed to the public for the first time in February 1979 at the Naval Postgraduate School in California. Early versions of MATLAB were simple matrix calculators with 71 pre-built functions. At the time, MATLAB was distributed for free to universities. Moler would leave copies at universities he visited and the software developed a strong following in the math departments of university campuses.

In the 1980s, Cleve Moler met. They decided to reprogram MATLAB in C and market it for the IBM desktops that were replacing mainframe computers at the time. John Little and programmer Steve Bangert re-programmed MATLAB in C, created the MATLAB programming language, and developed features for toolboxes.

Election results for RC-13, IAPT
(Jan 2022-Dec2024)

In my capacity as returning Officer, I declare the following as elected unopposed to Regional Council RC-13 (Tamil Nadu and Pondicherry), IAPT, for posts mentioned against their names, for the term Jan 2022 to Dec 2024.

President: Prof. T. S. Natarajan (L1328)
Professor (Retd.), IIT Madras and IIT Tirupati

Vice-President: Prof. V. Madhurima (L1904) Professor, Department of Physics, Central University of Tamil Nadu, Thiruvarur, Tamil Nadu, 610005
Secretary: Dr. Manu Jaiswal, (L7972) Associate Professor, Department of Physics, IIT Madras, Chennai, TN 600036

Treasurer: Prof. Uthra Dorairajan (L7541), Professor, Department of Physics, DG Vaishnav College for women, Arambakkam, Chennai, TN

- Executive Members:**
1. Prof. G. Muraleedharan, (L1344), Gandhigram University, Tamil Nadu
 2. Prof. T. V. Banumathi (L4164), Sri G.V.G.Visalakshi College for Women, Udumalpet, Tamil Nadu, 642154
 3. Dr. S. Meenakshi Sundar, (L8190), Sri Paramakalyani College, Alwarkurichi, Tenkasi District, TN 627412
 4. Dr. Alok Sharan (L7980), Pondicherry Central University, Pondicherry
 5. Dr. Nirmal Thyagu (L8026), Madras Christian College, Tambaram, Chennai, TN
 6. (Co-Opted Member) Ms. Juno Thangakumar (L7650), Vidya Mandir Senior Secondary School, Mylapore, Chennai, TN

(In addition, Prof. C. Vijayan and Prof. N. Harish Kumar, IIT Madras, the outgoing President and Secretary respectively, will be ex-officio members of the RC and Prof. A. Anandavadivel, Sri Venkateswara College of Engineering, Sriperumbudur, presently representative of RC-13 in the IAPT Central Executive committee, will be an invitee for the RC meetings.)

G. Markandeyulu, IIT Madras
Returning Officer RC-13

MI : Merit Index is 80% of the average of Top Ten Scores in the respective IOQ 2021-22 Part I (NSE). All students scoring equal to and above MI are shortlisted for evaluation of their IOQ 2021-22 Part II (INO).

MAS : Minimum Admissible Score is 50% of the average of Top Ten Scores. No students below MAS is shortlisted for evaluation of IOQ 2021-22 Part II (INO). However students between MAS and MI may and may not be shortlisted. This depends upon which state he/she belongs to.

Prof B P Tyagi

Chief Coordinator (Examination)

Guidelines for the contributors

The IAPT Bulletin recommends for publication:

- Articles, reviews and short notes on subject matter related to physics content and physics teaching at secondary, undergraduate and postgraduate levels. The write-up must offer some new insight into the topic under discussion. Mere reproduction of information available on the internet be avoided.
- Letters and comments on matter published in the Bulletin.
- Reports, news and announcements about important physics related IAPT activities/events in the country.

Articles, reviews and short notes

- Research papers in specialised fields of mainstream physics may not be sent. Research journals catering to specific areas of physics already exist. However, reviews of recent developments in various fields are welcome.
- All the matter should be sent by email to iapt@pu.ac.in. Acknowledgement via email will normally be sent within 10 days. Submissions received via post without soft copy may be considered provisionally, but if accepted for publication then soft copy must be provided. Authors should retain a copy of their write-up, rejected articles will not be sent back. Contributors should give their contact number as well.
- The length of the write-up should not, ordinarily, exceed 6 pages of the Bulletin, including diagrams, photographs, tables, etc.
- All matter received for publication is subject to refereeing. The editors reserve the right to abridge/alter the write-up for the sake of clarity and brevity.

IAPT activity reports

The report must contain the following:

- Name of the activity
- Date/duration
- Venue of the activity
- Name of the coordinator/convener/organiser along with address, email and mobile number
- Organising institute along with collaborators, if any
- Sponsors, if any (IAPT, RC or any other funding agency)
- Summary of the activity

Maximum two photographs, if available, may be sent separately via email, preferably of the activity or audience.

Please send the report soon after the activity is over, not later than, say, three months.

If you are sending reports of more than one activities for publication in one issue of the Bulletin, kindly send a consolidated report of all the activities in a single communication.

MI : Merit Index is 80% of the average of Top Ten Scores in the respective IOQ 2021-22 Part I (NSE). All students scoring equal to and above MI are shortlisted for evaluation of their IOQ 2021-22 Part II (INO).

MAS : Minimum Admissible Score is 50% of the average of Top Ten Scores. No students below MAS is shortlisted for evaluation of IOQ 2021-22 Part II (INO). However students between MAS and MI may and may not be shortlisted. This depends upon which state he/she belongs to.

Chief Coordinator (Examination)

INDIAN ASSOCIATION OF PHYSICS TEACHERS

(Registered under Section XXI of Societies Act 1860, Regd. No. K 1448)

Membership Form

(PLEASE FILL IN CAPITAL LETTERS)

To,
Secretary IAPT
Regd. Office
Kanpur-208017

Date.....

Dear Sir,

I wish to join IAPT as a

1) Life Member 2) Annual Member 3) Student Member 4) Institutional Member 5) Library

I am remitting a fee of Rs.....through Cheque/DD/UTR No.....
dt..... of.....Bank.

Name :

Qualification.....Sex.....Age.....

Official Address

.....
.....Town.....Pin.....

Mobile No.....Email ID

Mailing address (if different)

.....
.....Town.....Pin.....

Mobile No.....Email ID

Sincerely yours

MEMBERSHIP & SUBSCRIPTION FEES

(i)	Life Membership	:	Rs. 2000/=	(US \$ 460)
(ii)	Annual :	Institutional	:	Rs. 10000/= (US \$ 3000) [Rs 25,000 for three years]
		Library	:	Rs. 500/= (US \$ 150)
		Individual	:	Rs. 250/= (US \$ 100)
		Student	:	Rs. 250/= (2 Yrs.)
		Single Copy	:	Rs. 25/=

The bulletin is sent free to Life Members of IAPT.

(Payment should be made by DD /Multi City Cheque in favour of **Indian Association of Physics Teachers, payable at Kanpur**)

Bank Detail for Online Transaction :

Name : Indian Association of Physics Teachers
Account No.: 20768203191
IFSC Code : IDIB000K521
Bank Name : Indian Bank
Branch : Kakadeo, Kanpur

ASTRONOMICAL CLOCKS

Astronomical clocks or Horologium or Orloj is a clock with special mechanism and dial to display astronomical information such as the relative position of the Sun and Moon, lunar Phases, Zodiacal Constellations and some major planets visible at a given location along with local time. These clocks usually represent the solar system using geocentric model. These clocks are like primitive Planetarium displaying the current state of the visible sky. Earliest reference of Astronomical clocks is 11th century in China and 1330 AD in Europe.

Prague Astronomical Clock -Orloj. It is mounted on the southern wall of Old Town Hall is a medieval astronomical clock installed in 1410AD. It is the third oldest astronomical clock in the world and still working. Its dial is a form of Mechanical Astrolabe

Miniature sheet with one stamp-depict Calendar Plate mounted below the main dial of Orloj. On the edge of circle is a church calendar with fixed holidays and the name of 365 saints. The Board displays allegories of the months. smaller images depict Zodiac Sign

The Town Hall Clock- Orloj

At outer edge of blue circle are timescale of 24 hours a day. Inside outer circle lies movable Zodiac circle, with Zodiac sign in anticlockwise direction.

Walk of Apostles-St. Peter and other apostles which appear every

Miniature Sheet of Joint Issue-depicting Sundial of Stara Bystrica astronomical clock and main dial of Town Hall astronomical clock Orloj
